

CIVIL SERVICES

From water towers and roads to airport runways and planning studies, our team has the knowledge and experience to handle any project, large or small. Ulteig offers a full range of civil disciplines, including aviation, municipal, planning and environmental, surface transportation and infrastructure, water/wastewater, and water resources services. We take the time to understand your needs and apply our understanding to provide innovative and reliable solutions that sustain your built-environment.

AVIATION

We provide total aviation engineering — including both airside and landside design — and planning services to air carrier airports, general aviation airports, and military installations. We partner with our clients to leverage their current facilities and future capital improvements to the greatest possible advantage for the communities they serve.

- Design
- Construction
- Environmental

MUNICIPAL

Ulteig helps communities develop and manage their infrastructure and resources by connecting technical expertise to the vision of community leaders and their constituents. We make certain that your existing characteristics and natural resources are preserved, ensuring that what we do today will serve your community well tomorrow and beyond.

PLANNING & ENVIRONMENTAL

We help our clients develop and manage their communities' built-environment and natural resources while enhancing their quality of life. Municipalities, private developers, federal agencies, and regional planning bodies all rely on Ulteig to help them make informed decisions that result in sustainable systems, vibrant communities, and livable places.

- Community Planning
- Land Development Services
- Public Involvement
- Environmental Services
- Landscape architecture

TRANSPORTATION

Our services produce responsible results for connecting people to one another and their workplaces, connecting resources and goods to consumers, and connecting entire economies to one another. Our approach allows us to produce long-term transportation solutions.
