

# COMMUNICATIONS

Ulteig works on an expanding variety of communications infrastructure projects, including cellular, microwave, two-way radio, and fiber. Our expertise guides the latest technology to research and determine all site design data required for any project. We complete each project quickly, efficiently, and cost-effectively.

During the past decade, Ulteig has worked with clients on a wide range of communications projects — large and small. Our proven commitment to unmatched client service results in a positive client experience. From concept through construction and beyond, Ulteig has the experience and expertise to meet your communications infrastructure needs.
